Gill-green™ Our Commitment

Long before green became the color to be, Gill-line took our corporate responsibility to a clean environment seriously. Now celebrating our 75th year, we are, and have always been, committed to the concept of accountability to the habitat we all share.

For over two decades we have used inks consisting of 100% solids. These inks contain no heavy metals. Our screen, offset, and digital inks are considered free of volatile organic compounds (VOC) and are cured by ultraviolet light. Flexographic items use water based inks. In addition, our pressure sensitive adhesives are water based and VOC free.

Many of our internal materials are recycled such as copper and magnesium dies, aluminum plates, certain films and chemicals, and plastic and magnetic materials. Even cardboard, paper, magazines, and soda cans are collected for recycling.

We are proud to offer many products on 100% recyclable materials and will continue to seek new methods of source reduction and ways of living earth friendly.

Gill-green™ Earth Friendly Products

All items in the Gill-green Zone show a symbol that identifies them as Recycled, Recyclable or Biodegradable.

Note - These symbols printed on request.

RECYCLED

RECYCLED: Products made from pre- or post-consumer waste.

Pre-consumer waste: Waste material from the manufacturing process that is recycled back through the same manufacturing process.

Post-consumer waste: Materials or packaging discarded by households or businesses that is collected and processed for other uses.

BIODEGRADABLE

BIODEGRADABLE: Products that have the ability to break down safely, and relatively quickly, by biological means and pose no toxic threat when disposed through conventional waste systems.

RECYCLABLE: This symbol identifies Gill-line products that are 100% recyclable. Check local availability for recycling programs.
